Claims Allowed

Claims 1-22 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the claimed combination of: a method for controlling a drive unit of a vehicle, comprising: a) setting a free-wheel mode, in which the vehicle operates with a clutch disengaged, as a function of one of a driving situation and an operating state of the drive unit; and b) setting an output variable of the drive unit to a constant value during a transition between an engaged-clutch travel mode and the free-wheel mode; or: a device for controlling the drive unit of a vehicle, comprising: means for operating the drive unit of the vehicle as a function of one of a driving situation and an operating state of the drive unit, in a free-wheel mode in which the vehicle operates with the clutch disengaged; and means for setting an output variable of the drive unit to a constant value during a transition between an engaged-clutch travel mode and the free-wheel mode.

No particular single feature of the claim renders the claim as a whole patentable. Only the claim taken as a whole combination is deemed new and unobvious. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
